DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: In claim 3, line 9, insert a "period" after "screening". Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Kulish et al. (US Pub.2002/0109472).

Re claims 1 and 2, Kulish discloses a multi-channel induction accelerator (Fig. 1), comprising:

an injector block (I) (Fig. 1; paragraph [0028]);
a drive source (6) (Fig. 1; paragraph [0028]);
output systems (5) (Fig. 1; paragraph [0028]); and
a multi-channel induction acceleration block (3), which is made in the form of an aggregate of one-channel linear induction acceleration blocks (including those that are placed parallel with one to other), each of which is made in the form of a sequence of linearly connected acceleration sections, each of which, in turn, is made in the form of one or more magnetic inductors enveloped by conductive screening (13) in which at least one of the conductive screens is made in a such manner that it envelops, at least two acceleration sections, which belong to

different one-channel linear induction acceleration blocks (i.e., metallic screen) (Figs. 3-6; paragraphs [0029] – [0033], [0077]).

Re claim 3 and 4, Kulish further discloses the multi-channel induction accelerator of the multi-channel induction acceleration block is composed (configured) in accordance with the design scheme of the acceleration block of the multi-channel induction linear (undulation) accelerator (Figs. 1-3, 12-18; paragraphs [0027], [0055], [0091]).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kulish et al. (US 6,433,494); and Hiramoto et al. (US 6,580,084); also teach similar inventive subject matter.
